

CELL MACHINES

Empire's single-station cell machines serve as just one example of how we meet the ever-changing demands of manufacturers worldwide. Our cell machines reduce inventory requirements and conserve floor space, giving many customers the winning edge in an increasingly competitive global marketplace.

Empire cell machines package our automation arsenal into compact systems designed to conserve space and keep parts jumping through the production process. The actions of these systems can be coordinated through programmable controls, if required, to synchronize blast pressures and duration, nozzle movement, part orientation and other variables affecting cleaning, peening and finishing operations. Our test lab and engineering staff work imaginatively with customers to deliver the "leanest, cleanest" machine for the job.
