All-in-one protection

HMXi features all-in-one protection for your head, face, and respiratory system. Coaters and painters feel assured knowing their head is protected, and their viewing area is enlarged for optimal vision. The airflow in the HMXi is designed to rush over and around the top of the head to deliver maximum cooling to the face while also providing superior respiratory protection.

Choices for the way you work

Full bib shrouds attach within seconds to the HMXi Helmet offering coaters and painters two materials to choose from. Lightweight DuPont™ Tychem® 2000 or 4000 and chemical resistant shrouds for added protection.

HMxi Coatings System

Head, Face, and Respiratory
Protection All-In-One... HMxi is
the Total Solution for your
Coatings and Painting Needs.

Made in the USA

Free-Air[®] pumps

Easy to operate and easy to maintain, our Free-Air pumps offer a low-cost way to supply clean, breathable air to workers in contaminated environments. They are an economical air source when compressed air is not available and an inexpensive way to add breathing capacity when a compressed air source is at its maximum utilization.

ICE

Electric Drive
(EDP10 and EDP50)

Compressed Air

Bullard provides several options for monitoring CO and improving air quality in the workplace. Our line of Clean Air Boxes (CABs), CO Monitors, and 41 Filters help you stay safe and compliant while on the job.

Stay comfortable

Our flow control devices provide workers with superior comfort and durability. Stay cool or keep warm, whatever climate you choose, we have a flow control solution for you. In addition, Bullard offers unique options in cooling. Our Frigatron is designed specifically to work with free-air pumps, while our Dual Cool provides cooling to the workers helmet and torso offering head to waist cooling.

Feel the flow

The EVA Series of Powered Air-Purifying Respirators offer the highest tested airflow in the industry for cooling comfort. EVA delivers a safe, comfortable, and productive experience for workers, while the EVAHL offers users all the same features for use in hazardous locations.
